NEWS OF THE CITY.

Ewell & Jacob will furnish Gasoline for Gasoline lamps and stoves at low rates.

The Masonic fraternity gave Grand Master Reynolds a very clever reception last night. After closing a joint meeting of the Delta and Cairo lodges, the brethren escorted the Grand Master to Louis Herbert's restaurant, where a supper, such as Louis is wont to prepare on extra occasions, was discussed with that relish for which the craft are rather distinguished. It was a real pleasant reunion.

THE TALE ABOUT ELLIOTT HAYTHORN & CO.—Fathers and mothers, maids and ladies, in all parts of the city are talking about the new stock of boots and shoes just received by Elliott, Haythorn & Co. For the wholesale trade there are cords or cords of cases; but in this, retail buyers are not specially interested. The road department forms the attraction with them. So many new styles, such beautiful garters, such splendid boots! The like was never seen in Cairo. And then there are Kelsinger patent shoes, Arctic boots, French calf boots, and all other kinds of boots, sewed and pegged, for gentlemen and fell slippers, in luxury. Sensation shoes, French heeled and Grecian bend, and all other styles of shoes and slippers, for ladies, misses, and children! The stock is immense, unequalled, beautiful and cheap! We looked through the establishment this morning, and know whereof we speak; when we declare that Elliott, Haythorn & Co., are prepared, better than ever, to supply all demands, ordinary or extraordinary, for boots and shoes. Before you permit anybody, then, to lure you into the purchase of foot-wear, go see Elliott, Haythorn & Co. Sept 23d

INTERESTING TO THE LADIES.—Dresses for the Fall and Winter of 1870-71.—Cunningham has just forwarded his initiatory invoice of Dress Goods from New York, for the Fall and Winter trade. Never was there a more attractive variety offered for the approval of the ladies than those now offered at Cunningham's. The fashions, the extravagant and the economical may each find something suited to her taste and pocket.

Cunningham's store has always been the popular resort for Dress Goods, and Mr. Cunningham is determined that nothing shall be left undone upon his part, to retain the popularity of his establishment. He is now in New York making his selections and will soon offer the largest and best variety of Dress Goods ever offered in this city. He proposes to do a large office business this Fall, by selling at a fair, square, honest price. Go and see his assortment of plaid, he has the Stuart, Victorian, Gordon and Bob Roy, which are without doubt the most fashionable goods now worn.

Fine French calf boots, and gents wear generally—custom work—may be found at Elliott, Haythorn & Co.'s, at low prices than elsewhere in the city. 21

WHAT DOES REASON SAY?—The little mongOOSE when bitten by a deadly serpent resorts to a certain plant, eats of it, and escapes the effect of the poison. That is instinct. Human beings on the other hand, must depend on reason and experience in selecting the means of protecting health and life against unwholesome influences. Now what does reason say on this vital subject? Does it not tell us that to invigorate and purify the system is the best way to protect it against the invisible poison which generates disease? Surely it does. The next question is, what guide shall we follow in choosing a medical safeguard? Reason replies let your monitor be experienced. Well, the experience of eighteen years comprised in one unbroken series of satisfactory testimonies assures us that Hostetter's Stomach Bitters possess strengthening, regulating and antiseptic properties which are not combined in the same happy proportions in any preparation extant. This therefore is the antidote to which reason bids us resort when our health is imperiled either by the malaria which produces epidemic disorders or by any other cause, whether inherent and constitutional or connected with our habits, occupations or pursuits.

The venom of a newt is repellent to many more subtle and dangerous than that which lurks in scatulae and impure water. To escape the fevers, bilious disorders, disturbances of the bowels, and other diseases produced by these insidious elements, it is absolutely necessary that the stomach and all the sensitive organs should be, so to speak, in a robust condition. Upon the amount of resistance which the vital system can oppose to the deleterious influences that assail it the safety of the health depends, and it is because the great vegetable, invigorating, saporous energy and regulative is the most important function of the body, that it can be recommended and guaranteed as an invaluable preventive medicine.
